### About

I'm an IOS developer with more than **1 year** of experience. I work primarily with Swift, but also understand Objective-C.

My primary stack:

VIPER, MVVM, UIKit, SnapKit, Alamofire, Realm, CoreData, GitlabCI, Fastlane, DI with ServiceLocator pattern. I also played with RxSwift and will be happy to work with it on your project.

### Experience

#### Rentateam

Feb 2021 – Now

- [KFC](#)  
Participated in app redesign and bug fixes, which led to AppStore rating growth up to 4.6 and absence of negative feedback about the app.
- [Skoda](#)  
Worked on eShop, an internal marketplace for original accessories and spare parts.
- [NLMK](#)  
Migrated main user flow from WebView to native, significantly improving user experience.  
Made complete VIPER modules for Order, Delivery, Checkout etc.
- [Event ticket check-in app](#)  
I made a complete app redesign using a pixel-perfect approach. This allowed our customer to start selling the application as a separate product and receive funding from investors.
- [CI/CD](#) - Deployed GitlabCI + Fastlane for 4 different projects

### Education

#### Moscow Power Engineering University

2007-2013

Master's degree
